

# MS Statomix® Static Mixers

MS static mixers from Ashby Cross are available in all sizes and configurations to fit any cartridge or adhesive dispensing system. The MS static mixer is referred to as a “machine” mixer and has yellow elements to help distinguish them from other mixers. Machine mixers typically use the stronger acetal plastic to withstand the higher pressures of adhesive dispensing equipment. MS static mixers are designed to fit Liquid Control and several other types of meter, mix equipment. Priced below list, they are available with various outlet configurations such as Luer Lock, barbed end with tubing, or custom configurations.

The MS static mixer has a slightly larger opening at the entrance than the MS series static mixer.

**All mixers competitively priced and in stock.**
