

# Static Mixers: MFHX Style

## MFHX Static Mixer

F-System static mixers are compatible with cartridges of 200 mL and 400 mL volumes, using a manual or pneumatic dispenser. The mixer assortment includes different mixing elements, lengths, diameters, mixer tips, and accessories. Its coded interface prevents cross-contamination.

The separate inlets provide a static mixer that will not cross contaminate and ensures a leak-free connection. The helix mixer elements assure complete mixing of the two components. Static mixers are available in a range of sizes from 1/4 inch (6mm), 5/16 inch (8mm), and 3/8 inch (10mm). Lengths within each sized include 18, 24, and 32 element.

The correct size will depend on the viscosity and miscibility of the two components. The adhesive manufacturer can make recommendations.

Please see the static mixer chart below for reference.

**All mixers competitively priced and in stock.**

PART NO.	Article	Description	Elements	Ø (mm)	L (mm)	Vol. (ml)	Units/box
102473	MFHX 06-18T	Mixer helix, 4:1/10:1 orange elements, stepped tip	18	6.0	156	4.16	1,700
102474	MFHX 06-24T	Mixer helix, 4:1/10:1 orange elements, stepped tip	24	6.0	194	5.20	1,700
113275	MFHX 06-32T	Mixer helix, 4:1/10:1 orange elements, stepped tip	32	6.0	245	6.56	1,200
102475	MFHX 08-18T	Mixer helix, 4:1/10:1 orange elements, stepped tip	18	8.0	187	7.28	1,400
102476	MFHX 08-24T	Mixer helix, 4:1/10:1 orange elements, stepped tip	24	8.0	234	9.14	1,200
112720	MFHX 08-32T	Mixer helix, 4:1/10:1 orange elements, stepped tip	32	8.0	296	11.55	900
102477	MFHX 10-18T	Mixer helix, 4:1/10:1 orange elements, stepped tip	18	10.0	224	12.96	1,000
102478	MFHX 10-24T	Mixer helix, 4:1/10:1 orange elements, stepped tip	24	10.0	283	16.70	900
